

LUNCH WORKSHOPS (hall 152)

ThermoFisher
SCIENTIFIC

SUNDAY, 12:40

Alternative approaches to high throughput imaging: new CellInsight CX7 "PRO" Series HCS platform and EVOS M7000 fully automated digital microscope

Fabrizio Cozzani, Sr. Technical Sales Specialist, ThermoFisher Scientific

The choice of the type of imaging platform must be based on specific needs. The two alternative systems that are presented although both based on imaging are aimed at scientists with different perspectives and purposes.

MONDAY, 12:50

New development in flow cytometry by Invitrogen

Thomas Veitinger, Sr. Technical Sales Specialist, ThermoFisher Scientific

BigFoot Spectral Cell Sorter and Attune Cytpix Acoustic Focusing combined High Speed Camera.

MINI-WORKSHOPS (hall 152)

SUNDAY, 14:35

Spectral single-cell sorting and high-throughput plate sorting with the Invitrogen™ Bigfoot full spectrum cell sorter

Thomas Veitinger, Sr. Technical Sales Specialist, ThermoFisher Scientific

MONDAY, 9:00

Hands-on semi-automated digital microscope: EVOS M5000 imaging system

Fabrizio Cozzani, Sr. Technical Sales Specialist, ThermoFisher Scientific

EVOS M5000 is a high-quality digital microscope flexible, robust and easy to use that can be placed on the workbench as a perfect partner of a Cytometer.

MONDAY, 9:40

Spectral single-cell sorting and high-throughput plate sorting with the Invitrogen™ Bigfoot full spectrum cell sorter

Thomas Veitinger, Sr. Technical Sales Specialist, ThermoFisher Scientific

MONDAY, 10:20

Hands-on semi-automated digital microscope: EVOS M5000 imaging system

Fabrizio Cozzani, Sr. Technical Sales Specialist, ThermoFisher Scientific

EVOS M5000 is a high-quality digital microscope flexible, robust and easy to use that can be placed on the workbench as a perfect partner of a Cytometer.

MONDAY, 11:30

Flow cytometry assisted by imaging: immunology

Sophie Noddings, Sr. Field Application Scientist (Flow Cytometry)

ThermoFisher Scientific

How Attune CytPix brings additional tools to Immunology applications.

MONDAY, 12:10

Hands-on semi-automated digital microscope: EVOS M5000 imaging system

Fabrizio Cozzani, Sr. Technical Sales Specialist, ThermoFisher Scientific

EVOS M5000 is a high-quality digital microscope flexible, robust and easy to use that can be placed on the workbench as a perfect partner of a Cytometer.

MONDAY, 15:00

Flow cytometry assisted by imaging: immunology

Sophie Noddings, Sr. Field Application Scientist (Flow Cytometry)

ThermoFisher Scientific

How Attune CytPix brings additional tools to Immunology applications.

MONDAY, 15:40

Hands-on semi-automated digital microscope: EVOS M5000 imaging system

Fabrizio Cozzani, Sr. Technical Sales Specialist, ThermoFisher Scientific

EVOS M5000 is a high-quality digital microscope flexible, robust and easy to use that can be placed on the workbench as a perfect partner of a Cytometer.

MONDAY, 16:20

Flow cytometry assisted by imaging: immunology

*Sophie Noddings, Sr. Field Application Scientist (Flow Cytometry)
ThermoFisher Scientific*

How Attune CytPix brings additional tools to Immunology applications.

TUESDAY, 9:40

Hands-on semi-automated digital microscope: EVOS M5000 imaging system

Fabrizio Cozzani, Sr. Technical Sales Specialist, ThermoFisher Scientific

EVOS M5000 is a high-quality digital microscope flexible, robust and easy to use that can be placed on the workbench as a perfect partner of a Cytometer.

TUESDAY, 10:20

Flow cytometry assisted by imaging: microbiology

*Sophie Noddings, Sr. Field Application Scientist (Flow Cytometry)
ThermoFisher Scientific*

How Attune CytPix brings additional tools to microbiology applications.
